ADVANCED ENERGY 2010
NEW YORK STATE'S PREMIER CONFERENCE FOR ADVANCED ENERGY

CALL FOR POSTERS

The Advanced Energy Center in partnership with academic institutions, utilities and industry, announces a two-day conference to discuss technical and educational issues on energy.

The conference is timely in that the world is witnessing an unprecedented growth in developing countries, which presents challenges for the resources needed to sustain such growth. The challenge for the scientific community is to identify technical approaches that will hasten the introduction of energy technologies in the marketplace.

Contributions are solicited to review recent developments, driven by both fundamental research and technology, in areas of energy policy, bioenergy, smart networks, smart grids, geothermal, biofuels, cyber security, advanced generation, solar, advanced lighting, energy efficiency, hydro power, nuclear, battery and energy storage, green datacenters, green building technology, solar, and other related topics. An exciting line-up of invited speakers will be attending.

Please check with the http://www.aertc.org/conference2010/
website for periodic updates.

The process for abstract submission via email is now extended until October 4th 2010.

When submitting, please specify one of the three following categories:

☑ Undergraduate college student (judged session)

☑ Graduate college student (judged session)

☑ Industry/Academic representative

Please send all abstracts to Mr. Adam Ortiz at Adam.Ortiz@stonybrook.edu

Individuals will be notified of acceptance by October 8th, 2010 via email. Further instructions (poster specifications, prize amounts, etc.) will also be provided.

Authors are invited to fill out the Abstract Submission Form (attached) in order to submit their abstracts (max: 250 words), a short bio (max: 150 words), and a headshot (JPG, JPEG format). The abstract will be the basis for paper selection, and we advise authors to focus on describing the salient aspects concisely.
