

# GREEN IS THE NEW RED WHITE & BLUE

## **BUSINESS OF CLEAN TECHNOLOGY**

HELD AT THE 20TH ANNUAL BUSINESS TRADE SHOW & CONFERENCE

THURSDAY MAY 22, 2008

SUFFOLK COUNTY COMMUNITY SPORTS AND EXHIBITION COMPLEX

The Business of Clean Technology Committee of The Hauppauge Industrial Association invites you to attend a most important seminar during the 20th Annual Trade Show and Conference.

Date: May 22, 2008  
Time: 2:00pm to 4:00pm  
Location: Auxiliary Gym

The seminar will focus on both the impact of energy initiatives on the Long Island economy and the business and career opportunities Clean Tech offers to Long Island businesses, professionals and students. It will highlight how Long Island and New York State can become the leading economic beneficiary of the national commitment to renewable energy. Increased use of renewable energy along with promoting energy efficiency will reduce our dependence on foreign fuel, stimulate the regional economy, improve the environment, help control energy usage costs, and promote new business formation and business expansion leading to more high-skilled jobs for Long Island and New York.

The seminar will cover many aspects of Long Island's growing regional alternative technology initiatives, including the Alternative Energy Research and Technology Center (AERTC), Congressman Israel's Next Generation Energy Security Congressional Task Force, the recently released Lt. Governor's report of the Renewable Energy Task Force and how public/private partnerships, innovation and collaboration can foster new business formation and expansion opportunities for Long Island.

There is no charge for attending this important seminar but seating is limited. Pre-registration is strongly suggested to guarantee seating. Reserve your seat by registering online @ [www.hia-li.org/tradeshow2008](http://www.hia-li.org/tradeshow2008).

For information on HIA Tradeshow and Conference (attending, exhibiting or sponsoring) please call us at 631.543.5355 or log on to [www.hia-li.org/tradeshow2008](http://www.hia-li.org/tradeshow2008)
